A QUICK GUIDE TO MAINTAINING YOUR PRODUCT

see what Delta can do™

Your new Delta® product is engineered for superior performance inside and out—with thoughtful features that make a difference in your everyday life. We're dedicated to our product's performance and want your experience to be a great one. These guides will help you care for your product, and if you need a hand our team of customer service experts is here to help.

CLEANING AND CARE

To clean, simply wipe gently with a damp cloth and blot dry with a soft towel. Allowing water to evaporate on the surface can lead to build up of mineral deposits. To remove water spots, use warm water and a soft, damp cloth. Hard water stains may be removed using a 50/50 solution of white vinegar and water. Make certain that you rinse the surface thoroughly with water afterward.

If additional cleaning is required, all of our finishes may be cleaned with the following household cleaners: Formula 409® Antibacterial All Purpose Cleaner, Fantastik® All Purpose Cleaner, or Windex® Original Glass Cleaner, when used according to the manufacturers' instructions for use.

Although its finish is extremely durable, it can be damaged by harsh abrasives or polish.

Avoid using the following:

- Industrial and abrasive cleaners, such as those used for toilet bowls
- Products that state on the label that they remove tarnish and rust and those containing hydrofluoric, hydrochloric and/or phosphoric acids and caustic agents
- Harsh abrasives or polishes
- Bleach-based cleaners
